- **M-Boot**

Description

ENTERPRISE is the name of the most complete data protection and restore solution on the market. Its DYNAMIC BUFFER can be installed easily using any operating system, providing the best results.

Thanks to its seamless integration with a Realtek 8139 chipset Ethernet card and with the WOL system (Wake-up On LAN) it is fully compatible to use with the networking tools SNCOPY and the advanced network control utilities M-User, M-Control and M-Boot.

Also available in a small format for special boxes of reduced size, it is an indispensable element for those who want to get the most out of the CUSTODIUS system.

Applications

GOVERNMENT and BIG COMPANIES. Used to avoid virus and trojans implantation, to prevent unwanted software installation, to control and management of entire computer networks (clone and monitor with M-User / M-Ctrl).

UNIVERSITIES and SCHOOLS. Used as above, and also, to load computers with multipurpose configuration. Custodius can manage up to 48 partitions with different operating systems, applications and courses configuration. Very useful to clean the session after every class.

COMPUTER MAINTENANCE. Maintenance companies can use this model to improve the profit of the maintained computers and networks.

ENTERPRISE

SPECIFICATIONS

INSTANT RESTORE	MS WINDOWS (all)
