### Description

LITE has all the functionality of PROFESSIONAL with regard to protection; however, it does not include any of its network utilities or cloning tools.

This model has been specifically designed for those who want the best protection at a more AFFORDABLE PRIZE.

Installed in a PCI slot, it protects the BIOS and can create up to 48 partition with Operating System along with data partitions for the permanent storage of important information.

### Applications

**GOVERNMENT and BIG COMPANIES.** Used to avoid virus and Trojans implantation, to prevent unwanted software installation.

**UNIVERSITIES and SCHOOLS.** Used as above, and also, to load computers with multipurpose configuration. Custodius can manage up to 48 partitions with different operating systems, applications and courses configuration. Very useful to clean the session after every class.

**COMPUTER MAINTENANCE.** Maintenance companies can use this model to improve the profit of the maintained computers.

**LITE**
