- Back-up Restore
- Multiboot
- 48 partition
- Windows compatible
- LINUX compatible
- UNIX compatible
- Network Clone
- SNCOPY
- M-User / M-Control
- M-Boot

### Description

The PROFESSIONAL model installed in a PCI slot, protects the BIOS and can create up to 48 partitions with different operating systems along with data partitions for the permanent storage of important information.

One of its main advantages is the capability to clone and use other network functions associated with the machine's own network card (packet driver compatible).

CUSTODIUS PROFESSIONAL is the best valued and the best sold model in the last three years.

### Applications

**GOVERNMENT and BIG COMPANIES.** Used to avoid virus and trojans implantation, to prevent unwanted software installation, to control and management of entire computer networks (clone and monitor with M-User / M-Ctrl).

**UNIVERSITIES and SCHOOLS.** Used as above, and also, to load computers with multipurpose configuration. Custodius can manage up to 48 partitions with different operating systems, applications and courses configuration. Very useful to clean the session after every class.

**COMPUTER MAINTENANCE.** Maintenance companies can use this model to improve the profit of the maintained computers and networks.

**PROFESSIONAL**

## SPECIFICATIONS
