

- Instant restoration
- 4 Partitions
- Windows compatible
- Easy installation
- No Multiboot

Description

CUSTODIUS TRAVEL or **CUSTODIUS** in **SOFTWARE** format, is the data protection solution for laptop users or for those who do not have any PCI slots available, or for those who simply want an easy way to protect their data with the capability to restore data files immediately.

TRAVEL is data protection software based on the traditional PCI card-based CUSTODIUS systems. This is a basic system that provides the necessary protection to allow its users to work confidently without having to worry about viruses, accidentally deleted files or software corruption.

Applications

MOBILE USERS. Avoid any type of misconfiguration (even the CMOS), virus, trojans, unwanted software installation. Just reboot the PC to clean the system.

CUSTODIUS TRAVEL can be installed in any PC running Microsoft Windows as Operating System.
